

First Sound Bank.

Experienced. Innovative. Sound.

Last week First Sound Bank employees donated blood to help replenish our regions blood supply. The blood drive was held in the 4th & Madison Building and was facilitated by Bloodworks Northwest. The blood donated by 5 of our employees could be used to save as many as 15 lives.

Someone in the U.S. needs blood every two seconds. Bloodworks Northwest helps to fill this need by collecting, processing, and distributing blood from more than 230,000 registered donors each year to over 90 hospitals in our area. Unfortunately the demand for blood far outweighs the number of donations received. While approximately 60 percent of the population is eligible to donate, less than 4 percent actually do. Please consider becoming a donor today. Donations can be scheduled and more information can be found at www.bloodworksnw.org.
